## Conundrums

1. On an Easter Egg Hunt Jackie found 10 eggs and ate 5 of them. Marina found 13, but only ate 1. Bianca only found 2 eggs and she ate 1 of them. Howard found 8 eggs and ate 4. Nathan found 14 and he ate them all. How many eggs did Gracie find and how many did she eat?
  
2. There are two rooms, one immediately above the other. The bottom one has a window but the top is windowless. The bottom room has three light switches, each controlling just one of the three lights in the room above. Each of the three lights is fitted with a 60 watt bulb. Visiting each room only once, how do you determine which switch controls which light?
